EDUCATION

University Of Central Florida

Graduated Aug, 2026

BS, Computer Science

Orlando, FL

- GPA 4.0
- President's List 2024-2026

PhD, Computer Science

Began August, 2026

- Lab: SAIL@UCF
- Advisor: Aashish Yadavally

Orlando, FL

RESEARCH

Software Engineering for Artificial Intelligence Research Lab (SAIL@UCF) CSRanking#13

- Co-authoring a survey paper on testing non-determinism in agentic applications under Prof. Aashish Yadavally.

WORK EXPERIENCE

University of Central Florida

Aug 2025 – Present

Teaching Assistant(TA) - Data Structures & Alg 1 & 2/Senior Design 1/ Cryptography

Orlando, FL

- Lead weekly lab sessions for 150+ students, reinforcing data structure and algorithm concepts through live coding.
- Provide individualized tutoring and debug support during weekly office hours.
- Evaluate programming assignments and exams, ensuring consistency across multiple course sections.

METIL Lab/Department of Energy/ORETTC

Dec-Jan 2025

Research Intern

Orlando, FL

- Conduct AI/Cyber Security research for the Department of Energy/Department of Defense.
- Create simulations and testing environments for nuclear energy and defense scenarios.
- Author a research paper on Prompt Injection and implied security concerns of AI agents in a defense setting.

PROJECTS

Sentinel Grid Honeynet | Python | Backend Engineer/ Technical Lead

Completed

- Developing a backend that implements logging APIs for Honeynet.
- Led the technical development of the project

TSAT 2A (UCF Knights Satellite Club) | C++ · ESP32 | Software Engineering Team Lead

Completed

- Fully designed Embedded Systems C++ code for T-SAT Project

TypeRacer Web Game | MERN Stack · Express.js · Socket.IO | Backend Developer

Completed

- Built a 1v1 real-time typing game with live lobbies, matchmaking, and performance tracking.
- Integrated JWT authentication, REST API, and MongoDB backend during KnightHacks 8 Hackathon.

SKILLS

Coding Languages:

- Python, C, C++

Other Software/Frameworks:

- Git, Github, Wireshark, Bash, Arduino, Embedded Systems, ESP32, React, Node, MongoDB, Express, Servo, SocketIO, Nextjs

Clubs:

- Knight Hacks — Hackathon Participant (KnightHacks 8)
- Knights Satellite Club — Software Team Lead, TSAT Project
